

## Ultrahigh Density System

### MPO/MTP® 1U 19" Patch Panel

Used for 19" standard installation of integrated optical distribution frame, network cabinets and open type rack. To achieve terminal branches connection in light way. Adopt high-quality steel materials, the surface with electrostatic spraying, no impurities, no bubbles and other defects. Uniform color. Mini-fliplid design, compact and easy install, close coordination.

### Features:

- ① 19" rack mount, the panel and modules are made of cold rolled steel sheet;
- ② Module comes up to 24 LC or 12 SC adapter ports and switch to MTP/MPO connection;
- ③ 1U patch panel capacity come up to 72F fully loaded with 3 modules,
- ④ Factory pre-terminated module, plug and play on site, no need fiber splicing and cable wiring which saves labor cost.

### Application:

- ① Optical Access Network (OAN);
- ② Data Processing Centers;
- ③ Cable Television (CATV);
- ④ Local Area Network (LAN);
- ⑤ Coarse Wavelength Division Multiplexer (CWDM).
